

PrimeCast™

Orthopaedic Synthetic Casting Tape

- **Superior Moulding** — Excellent multi-directional stretch ensures optimal moulding on curved areas for a perfect fit.
- **In-House Knitted Fabric** — Knitted in-house to guarantee superior quality and consistency, making PrimeCast a reliable choice.
- **Cost-Effective** — Fewer rolls needed and minimize the need for re-casting compared to traditional POP bandages.
- **Versatile Substrates** — Available in both fiberglass and high-quality polyester (non-fiberglass) options to meet diverse patient needs.
- **Lightweight & Durable** — Offers exceptional strength and durability while being lightweight. Ensures comfort and allows easy monitoring of the healing process.

PrimeCast™

Orthopaedic Synthetic Casting Tape

PrimeCast is a high-quality synthetic casting tape impregnated with polyurethane resin, activated by water before use. Its superior moulding capabilities and in-house knitted fabric ensure consistent, reliable performance.

Available in fiberglass and non-fiberglass options, PrimeCast is lightweight, durable, and air-permeable, allowing for comfortable wear and easy X-ray monitoring.

PrimeCast is trusted worldwide, with years of successful sales proving its reputation as a top-quality product. PrimeCast is an excellent choice for effective injury immobilization.

How to Use

1. Apply a stockinette and a cast padding over the desired area to be cast.

2. Wear protective gloves.
3. Immerse PrimeCast in water for 1-2 seconds.

4. Squeeze the tape gently to remove excess water and wrap the desired area with the tape. Do not apply tightly.

Moulding and forming should be done at this time. Setting time is approximately 3-5 minutes. Functional strength will be achieved in 20
