PrimeSplint™

ORTHOPAEDIC SYNTHETIC SPLINT (PRE-CUT AND ROLL TYPE)

Superior Support, Unmatched Comfort

- **All-in-One Design:** Streamlines application, saving time and improving patient experience.
- **Customizable Length:** Easily cut to the exact size needed, reducing waste and ensuring cost-effective use.
- **Clean and Efficient:** Less messy than traditional plaster splints, offering quicker application and cleanup.
- **Lightweight, Strong Support:** Provides excellent support within minutes, promoting early patient mobility.
- **Quick-Drying Padding:** Hypoallergenic and water-repellent felt padding dries faster than standard options, reducing skin irritation and improving comfort.
- **Convenient Instructions:** Clear, easy-to-follow instructions
- **Closure Rod Included:** Provides an airtight seal to maintain product integrity.

PrimeSplint™

Orthopaedic Synthetic Splint (Pre-Cut and Roll Type)

How to use

1. Select a desired size of Prime Splint and remove from foil pouch. (for roll type, cut to desired length and immediately reseal remaining roll in the foil pouch with clip)
2. Immerse the splint in water (18-30°C) and squeeze 2-3 times while submerged to fully saturate it.
3. Roll the splint and squeeze out the excess water.
4. Lay the splint on a towel and roll snugly and squeeze to remove remaining water.
5. Apply the splint on desired area of the patient and wrap with elastic bandage.

- Moulding and forming should be done at this time.
- Setting time is approximately 3-4 minutes.
- Functional strength will be achieved in 20 minutes.

PrimeSplint™-Synthetic Splint (Pre-Cut Type)
